

"How have changes in transport changed our daily lives?"

Important People

Henry Ford

Designed one of the **first motor cars**

The Wright Brothers

Designed the first successful **aircraft**.

Neil Armstrong

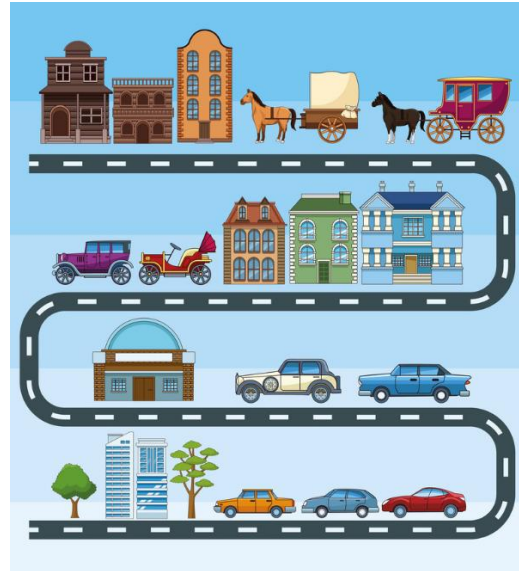

First astronaut to **land on the moon** in 1969.

Nigel Gresley

Designed **The Flying Scotsman**.

Transport in the past...

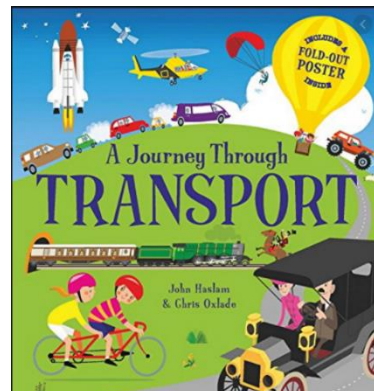

...through to modern day

Big Ws:

- In the past, **animals** were used to **transport humans and goods**.
- Many modes of transport are used to move people and goods **all over the world**.
- **Steam** was used to power many modes of transport for many years.
- The **Flying Scotsman** was the first train to reach 100 miles per hour.
- Transport is **changing all the time** to help us with our daily lives.

Vocabulary

engine- a machine that gives things the power to move

passenger- a person that travels on a vehicle

planet- the Earth we live on

steam power- when water is used to power something to move

transport- to carry people or things from one place to another

Take Aways

- ✓ I can talk about people who made types of transport.
- ✓ I can say things that are the same and things that are different between transport in the past and modern day.
- ✓ I can ask question about transport in the past.
- ✓ I can explain how transport makes our daily lives better.
- ✓ I can talk about how modern day transport makes our planet better and worse.
